EDUCATION

University of Illinois at Chicago (Honors College)

Chicago, Illinois

B.S. in Computer Science (Software Engineering Concentration): GPA 3.67, Dean's List

Expected Graduation, May 2026

- o **Related Coursework:** Data Structures & Algorithms, Cloud Engineering, Computer Organization, Data Science, Computer Design, Object-Oriented Programming, Computer Algorithms, Systems Programming

EXPERIENCE

Software Engineering Intern

Schaumburg, Illinois

Donatefy

May 2025-August 2025

- Built a **cross-platform React Native** Tap-to-Pay application (iOS and Android) that enabled nonprofits to **securely** accept donations directly from mobile devices, eliminating the need for expensive kiosks or hardware.
- Managed **Jira/Git** issues and time management of the offshore teams ensuring **consistent production** release dates
- Utilized **AWS services**, including **RDS, SMS, CloudWatch, EC2**, and **Amplify** to **deploy** and enhance production applications and use **Stripe payments** to process user transactions while storing financial **reporting** history.
- Navigated **Apple certification and security compliance** processes to successfully **deploy** the app, ensuring alignment with App Store policies and also uploaded the app to the Google Play Store for **distribution** to clients

Software Engineer

Chicago, Illinois

Americloud Tech

Feb 2024-May 2025

- Processed over **7 figures** in transactions by using applications developed using **Flutter, React** and **Node.js**
- **Resolved** Stripe Tap-to-Pay **integration** issues in Flutter by **debugging** and fixing defects in a **shared package**, contributing a pull request following Agile principles that **improved stability** across multiple **production** applications.
- Enhanced **customer engagement** by **28%** by decreasing unnecessary amounts of API calls resulting in less await times and improved state management resulting in **faster performance** and a **smoother UI** experience.
- Led development coordination/technical alignment, resulting in a ~20% improvement in sprint burndown efficiency.

Software Engineer Intern

Americloud Tech

Dec 2023-Feb 2024

- **Researched** and **Designed** POC as requested by sales to further our product catalog and **fulfill customer's** needs.
- Automated **50+ Appium test cases** with around a **90% code coverage** reducing 2+ hours of manual testing per build and strengthening the **CI/CD** pipeline while maintaining **secure, clean databases**.
- **Reverse-engineered** an existing **production system** to **document** database/design schema for new **onboarding** team
- Met 100% of **sprint** deadlines in an **Agile** environment, supporting **reliable** release cycles and team productivity.

PROJECTS

[GraphRAG Knowledge Graph Pipeline](#)

Chicago, Illinois

Scala, Apache Flink, Neo4j, Akka HTTP, Docker, AWS EKS

Aug 2025- Dec 2025

- **Built an end-to-end GraphRAG pipeline** that transforms unstructured research papers into a **searchable, queryable knowledge graph** using Flink stream processing and Neo4j persistence.
- **Deployed containerized REST microservices** on AWS EKS and implemented APIs for natural-language querying, evidence retrieval, and **interactive graph neighborhood exploration**.
- Enabled **efficient** exploration of large research corpora by providing **fast**, explainable graph-based **queries** that surface relevant concepts and supporting evidence without rechunking entire datasets.

[Ummah Awareness](#)

University of Illinois-Urbana Champaign

Docker, AWS, React, PostgreSQL, Javascript

October 2025

- Engineered an interactive world **visualization** platform that highlighted crisis regions, integrated **real-time** news articles from verified sources, and provided **secure** donation opportunities to **support** underserved communities.
- Designed and implemented **scalable** REST APIs and backend services to handle **real-time** data ingestion, validation, and delivery to the **3D** visualization creating a seamless UI Experience, winning 3rd place at competitive [hackathon](#).

Technical Skills

Languages & Frameworks: C++, Java, Python, JavaScript, TypeScript, Node.js, React, Flutter, SQL, Kotlin, C, Scala, GoLang

Tools & Platforms: Git, Jira, AWS (RDS, EC2, Amplify, CloudWatch, SMS), Postman, Android Studio, IntelliJ, VSCode, Cursor

Methodologies: Agile/Scrum, Test Automation (Appium), CI/CD, REST API's
