Software engineer with hands-on production experience across mobile, web, and cloud systems. Built and shipped payment integrations, optimized AWS infrastructure. Seeking Software Engineering Roles based around backend or cloud.

EDUCATION

University of Illinois at Chicago (Honors College)

Chicago, Illinois

B.S. in Computer Science (Software Engineering Concentration): Dean's List | GPA: 3.61

Graduation: May 2026

- o **Related Coursework:** Data Structures & Algorithms, Cloud Engineering, Computer Organization, Computer Design, Object-Oriented Programming, Computer Algorithms, Systems Programming, Artificial Intelligence

EXPERIENCE

Software Engineering Intern

Schaumburg, Illinois

Donatefy

May 2025-August 2025

- **Built a cross-platform** React Native Tap-to-Pay application that enabled nonprofits to **securely** accept donations directly from mobile devices, **reducing hardware costs** by **73%** while **supporting** over **10,000** transactions monthly
- Managed **Jira/Git** issues of 2 offshore teams, ensuring **94% on-time release dates** across **23 sprint cycles** with consistent production deployments and client distribution.
- **Migrated** and optimized **AWS services**, including **RDS, SMS, CloudWatch, EC2, and Amplify**, reducing **infrastructure costs** by **43%** while integrating Stripe payments to process user transactions and **store financial reporting** history.
- **Architected** an automated **version control** and **deployment pipeline** that tracked device versions and used scheduled **webhooks** to detect **AWS-hosted** updates, automatically **pushing new releases** to **50+** client devices.

Software Engineer

Chicago, Illinois

Americloud Tech

Feb 2024-May 2025

- **Developed** and maintained **Flutter, React, and Node.js** applications that **processed** over **\$1M** in transactions.
- **Resolved** Stripe Tap-to-Pay **integration** issues in Flutter by **debugging** and fixing defects in a **shared package**, contributing a pull request following Agile principles that **improved stability** across multiple **production** applications.
- **Reduced** unnecessary **API calls** and improved **state management**, increasing **customer engagement** by **28%** while delivering **faster load times** and a smoother user experience to allow **high-traffic usage** without issues.

Software Engineering Intern

Americloud Tech

Dec 2023-Feb 2024

- Implemented **real-time REST APIs** integrating Blackbaud and QuickBooks into the existing platform, **automating donor data** sync and **financial reporting** across **7,500+** transactions and **eliminating manual** data entry workflows.
- **Reverse-engineered** an existing **production system** to **document** database/design schema for new **onboarding** team.

Software Engineering Intern

Chicago, Illinois

UIS Consulting

May 2023-August 2023

- **Engineered** a **cloud-based** POS and online food ordering platform **integrated** with Kitchen Display Systems (KDS) to **automate real-time** order routing, timing estimates, and **queue management** across **50+** restaurant clients.
- **Delivered** an **embeddable** widget allowing restaurants to **integrate** online ordering **directly** into their existing websites, alongside an admin portal for **dynamic** menu management, prep time configuration, and **reporting**.

PROJECTS

GraphRAG Knowledge Graph Pipeline

Chicago, Illinois

Scala, Apache Flink, Neo4j, Akka HTTP, Docker, AWS EKS

Aug 2025- Dec 2025

- **Built an end-to-end GraphRAG pipeline** that transforms unstructured research papers into a **searchable, queryable knowledge graph** from **800+** research papers using Flink stream processing and Neo4j persistence
- **Deployed containerized REST microservices** on AWS EKS and implemented APIs for natural-language querying, evidence retrieval, and **interactive graph neighborhood exploration**.
- Enabled **efficient** exploration of large research corpora by providing **fast (<200ms)**, explainable **graph-based queries** that surface relevant concepts and supporting evidence without **rechunking** entire datasets.

Technical Skills

Languages & Frameworks: C++, Java, Python, JavaScript, TypeScript, Node.js, React, Flutter, SQL, Kotlin, C, Scala, Go

Tools & Platforms: Git, Jira, AWS (RDS, EC2, Amplify, CloudWatch, SNS), Postman, Android Studio, VSCode, Cursor

Methodologies: Agile/Scrum, Test Automation (Appium), CI/CD, REST APIs, Kanban, Lean, XP, Azure
